SEYED SAJJAD NAZARI

Junior Front-End developer

09308443072 • seyedsajjadnazari@gmail.com • https://ir.linkedin.com/in/seyed-sajjad-nazari • Mashhad

Summary

Passionate Front-End Developer with expertise in ReactJS, HTML, CSS, and JavaScript. Key achievements include developing a user-friendly registration interface that reduced user errors by 30% and designing an online registration system that improved data management. Committed to creating user-centric web solutions, with a strong focus on collaboration, innovation, and continuous learning. Excited to contribute to teams that value innovation and delivering exceptional digital experiences.

Skills

Technical Skills: Html, Css, React, JavaScript, TailwindCss, Sass, Axios, Vite

Experience

Graphic Designer
SEE5

Mashhad, Razavi Khorasan, Iran · Hybrid
02/2023 - 05/2024

- Designed promotional banners using Adobe Photoshop.
- Implemented graphic settings and improved user experience on websites for better engagement.
- Collaborated closely with various teams to align designs with clients' business goals and needs.
- Customized and optimized websites on WordPress, including adding banners and making design adjustments according to client requirements.

Frontend Developer
Dr. Shahid Beheshti Technical High School

Mashhad, Razavi Khorasan, Iran · On-site
06/2023 - 08/2023

- Developed a user-friendly registration interface that decreased user errors by 30% and improved overall user satisfaction, while enabling the generation of detailed registration reports for better management oversight.
- Admin Panel Development: Added advanced features like quick search, data filtering, and report generation. Exported data from the database in Excel format to improve efficiency and data accessibility.
- Online Registration System Development: Designed and developed an online registration system that eliminated registration queues and provided registration reports in Excel format, making statistics management easier.
- Team Collaboration Experience: Enhanced communication and teamwork by fostering strong connections between team members and ensuring smooth coordination, leading to improved productivity and successful project completion.

Projects

Online Registration System

- **Front-End Development:** Developed the website's front-end using HTML, CSS, and a JS framework along with Bootstrap.
- **Implemented Advanced Search and Filtering:** Enabled detailed user search and filtering capabilities, displaying results in a well-organized tabular format.
- **Developed Comprehensive Forms:** Created a complex form with 32 input fields, enhancing data collection and management.

GitHub User Search Website

- **GitHub User Search:** Implemented a GitHub user profile search feature and displayed user details via the GitHub API, providing quick and easy access to user information.
- **Tools and Libraries:** Vite, TailwindCSS, RemixIcon, VanillaJS, Axios.

AI Landing Page

- **Figma-Based Design:** Developed user-centric and aesthetically appealing interfaces using Figma, ensuring seamless user interaction and a consistent experience across all platforms and devices.
- **Tools and Libraries:** Vite, ReactJS, Git, TailwindCSS.
